ACKNOWLEDGEMENT

I am pleased to present my project proposal for 'Hotel Management System' as part of my BCA degree at Saurashtra University. Their expertise and constructive feedback greatly enhanced the quality of this work.

First, My special thanks to the faculty and staff for their continuous support. I deeply appreciate the collaboration, suggestions, and encouragement of my colleagues and peers, which helped me overcome challenges during the project. I would also like to acknowledge the hotel management professionals and industry experts whose practical insights ensured that the system met industry standards.

I would like to express my sincere gratitude to Prof. XXXXXX for their invaluable guidance, encouragement, and support throughout the development of this Hotel Management System project. Lastly, I am thankful to my family and friends for their unwavering support, patience, and motivation throughout this journey. Thank you to everyone who contributed to the successful completion of this project.

PREFACE

The **Hotel Management System (HMS)** is designed to streamline hotel operations by providing an efficient and user-friendly platform for managing room bookings, requests, and payments. This system ensures seamless communication between guests and administrators, enhancing overall hospitality management. With automated pricing, a structured admin dashboard, and a dedicated room request module, HMS simplifies hotel administration while improving user experience.

Built using Django and MySQL, HMS offers a secure and scalable solution for hotel businesses. The system provides separate login portals for admins and users, ensuring proper role-based access. Key features include real-time room availability, booking management, and a structured workflow for request approvals. By integrating these functionalities, HMS enhances operational efficiency, reduces manual effort, and improves service quality.

INTRODUCTION

The Hotel Management System is a web-based application developed using Python Django to streamline hotel operations, including room bookings, reservation management, and administrative tasks. It offers an intuitive interface for both staff and customers, enhancing efficiency and user experience. The system integrates frontend technologies like HTML, CSS, and JavaScript for a dynamic and responsive design. Key features include booking requests, request approval, room availability management, and reporting. The project aims to reduce manual errors, improve operational efficiency, and provide a scalable solution for hotel management. The HMS contain User module and Admin Module. Below describe with Description.

Admin Module –

The Admin Module is a core component of the Hotel Management System, providing administrators with a comprehensive dashboard and a range of management functionalities. The admin panel is designed to facilitate efficient hotel operations through the following features -

- **Dashboard** - Displays key metrics, including booking statistics, and Total revenue also providing an overview of hotel performance.
- **Booking Requests** - Shows all new booking requests submitted by customer allowing admins to review and process them.
- **Accepted Requests** - Maintains a list of approved bookings, helping admins manage confirmed reservations efficiently.
- **Manage Requests** - Enables the admin to reject booking requests.
- **Payment Details** - Allows the admin to view and manage payment transactions, track payment status.
- **Admin Profile** - Offers profile display username and e-mail according who is login in.
- **Log Out** - Provides a secure option to log out of the system, ensuring data security and preventing unauthorized access.

This module enhances the hotel's management efficiency by offering a centralized and user-friendly interface for administrative tasks.

User Module –

The User Module of the Hotel Management System is designed to provide a seamless and engaging experience for hotel customers. It consists of several static web pages that showcase hotel offerings and guide users through the booking process. The main features of the User Module include -

- **Home Page** - Welcomes visitors with an overview of the hotel, featured amenities, promotional offers and also Gallery of hotel room images.
- **Services Page** - Highlights the hotel's services, such as dining, spa, conference facilities, and additional amenities available to guests.
- **About Page** - Provides information about the hotel's history, mission, and values, helping build trust with potential guests.
- **Contact Page** - Displays contact information, including phone numbers, email addresses, and a contact form for customer inquiries.
- **Log-in Page** – User can login through this page with his/her data
- **Register** – New Customer should have to register first before login in.
- **User Profile** - Offers profile display Customer name, username and e-mail according who is login in.
- **Rooms Page** - Showcases the different room types available, including -
 - Deluxe Room (₹ 2000 Per night)
 - Superior Room (₹ 5000 Per night)
 - Exclusive Room (₹ 8000 Per night)
 - Luxury Room (₹ 10000 Per night)Each room type is presented with images, descriptions, and amenities, along with a "Book Now" button that redirects the user to the Booking Form page.
- **Booking Form Page** - Allows users to fill in booking details, including room selection, dates, and personal information, and submit a booking request to the admin panel.
- **Log Out** - Provides a secure option to log out of the system, ensuring data security and preventing unauthorized access.

This module ensures an intuitive and user-friendly interface, encouraging potential guests to explore hotel services and make bookings effortlessly.

SOFTWARE ENVIRONMENT

Technologies Used -

1. **Python (Django Framework)** - Backend development framework used for building the Hotel Management System with robust features and scalability.
2. **HTML** - Markup language used for structuring the content and layout of web pages in the system.
3. **CSS** - Styling language used for designing and creating a visually appealing and responsive interface.
4. **JavaScript** - Client-side scripting language used for dynamic interactions and enhancing user experience on the web pages.
5. **Bootstrap** - Frontend frameworks used for creating responsive and modern designs with minimal effort.
6. **Laragon** - Laragon is a fast, lightweight local development environment supporting PHP, Node.js, and Python for easy server setup and project management.
7. **MySQL** - Databases used for storing and managing hotel data, bookings, and payment information.
8. **Django** - Django is a high-level Python web framework that enables rapid development of secure, scalable, and maintainable web applications.

Technologies Break Down –

1. **Python (Django Framework)** -

Django is a high-level Python web framework that facilitates fast development of secure and maintainable web applications. It follows the Model-View-Template (MVT) architecture and provides built-in tools for database management, authentication, and routing, making it ideal for building the backend of the Hotel Management System.

2. **HTML** –

HTML (Hypertext Markup Language) is the standard language for creating the structure and content of web pages. It forms the skeleton of the Hotel Management System, organizing the content like text, images, links, and forms in a structured way for the user interface

3. CSS –

CSS (Cascading Style Sheets) is used to style the visual presentation of web pages. It controls aspects like layout, colours, fonts, and responsiveness, ensuring the Hotel Management System has an attractive and user-friendly interface across different devices.

4. JavaScript –

JavaScript is a programming language that enables dynamic behaviour on web pages, such as form validation, interactive maps, and content updates without reloading the page. It enhances the Hotel Management System's interactivity, making the user experience smoother and more engaging.

5. Bootstrap –

Bootstrap is a popular open-source frontend framework that simplifies web design and development by providing pre-designed components like grids, buttons, and navigation bars. It helps create responsive, mobile-first web pages for the Hotel Management System with minimal effort.

6. Laragon –

Laragon is a fast and lightweight local development environment that simplifies web development by providing essential tools like Apache, Nginx, MySQL, and more in a single package. It supports multiple technologies such as PHP, Node.js, Python, and others, allowing developers to easily set up and manage local servers for testing and development.

7. MySQL –

MySQL is a relational database management system used to store and manage data in the Hotel Management System. It efficiently handles data related to bookings, customer details, room availability, and payments, ensuring reliable data storage and retrieval.

8. Django –

Django is a high-level Python web framework that enables rapid development of secure, scalable, and maintainable web applications. It simplifies backend development with built-in tools for database management, security, and user authentication, making it an ideal choice for building the Hotel Management System.

SYSTEM REQUIREMENT

Hardware Configurations -

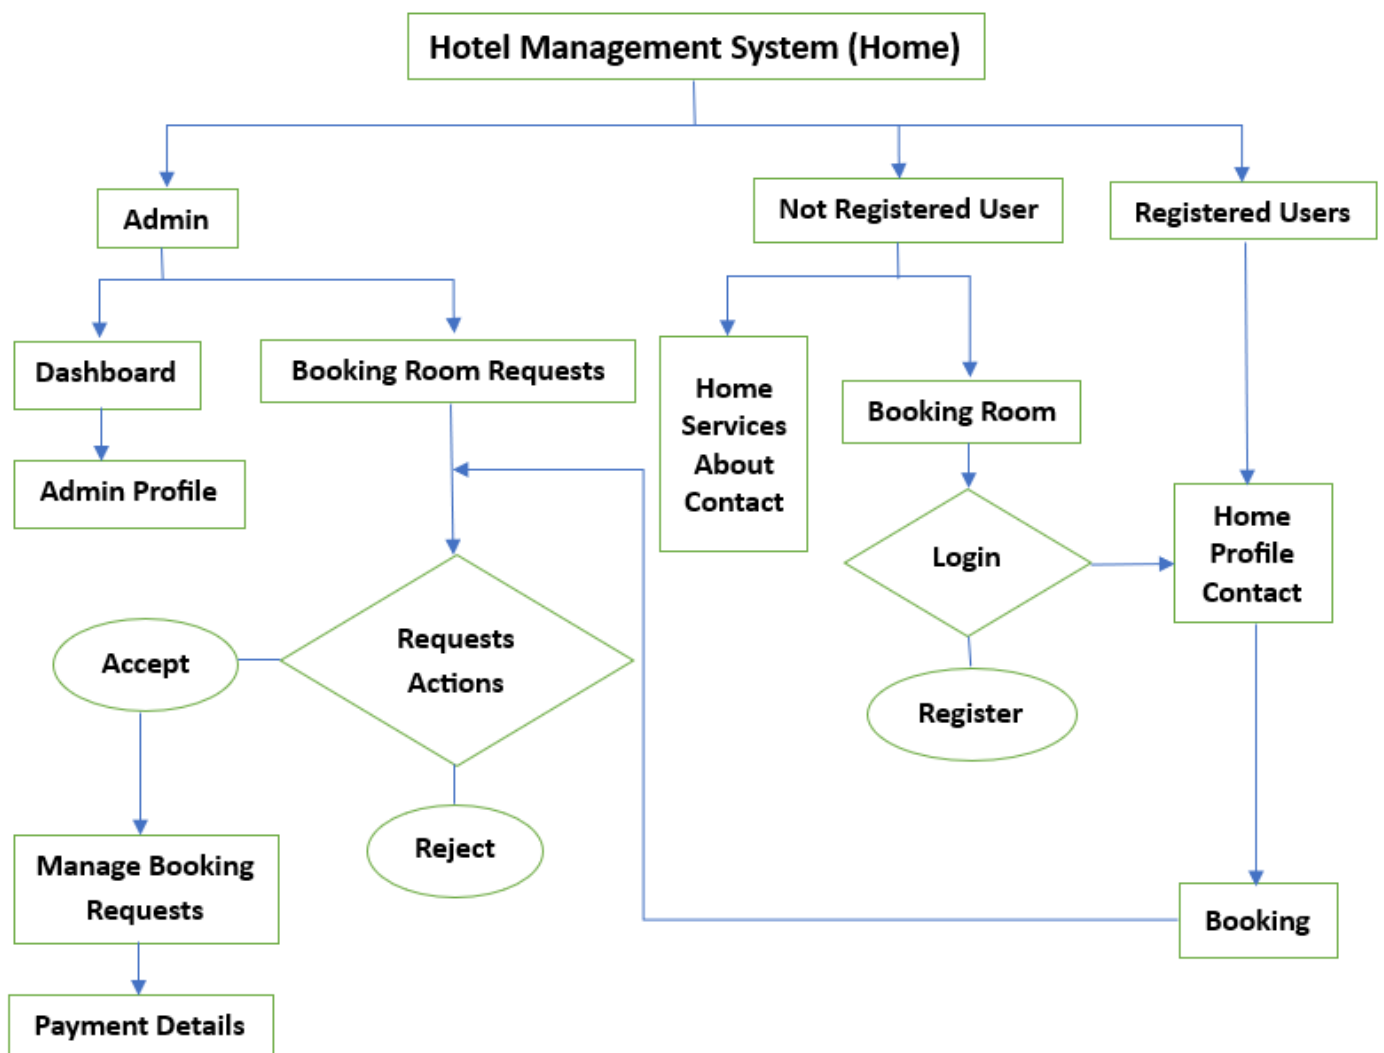

Processor	Intel Core i3
CPU	2.5 GHz
RAM	4 GB
Hard Disk Drive	20 GB
Monitor	15'6'' HD Display
Display Type	VGA

Software Configurations –

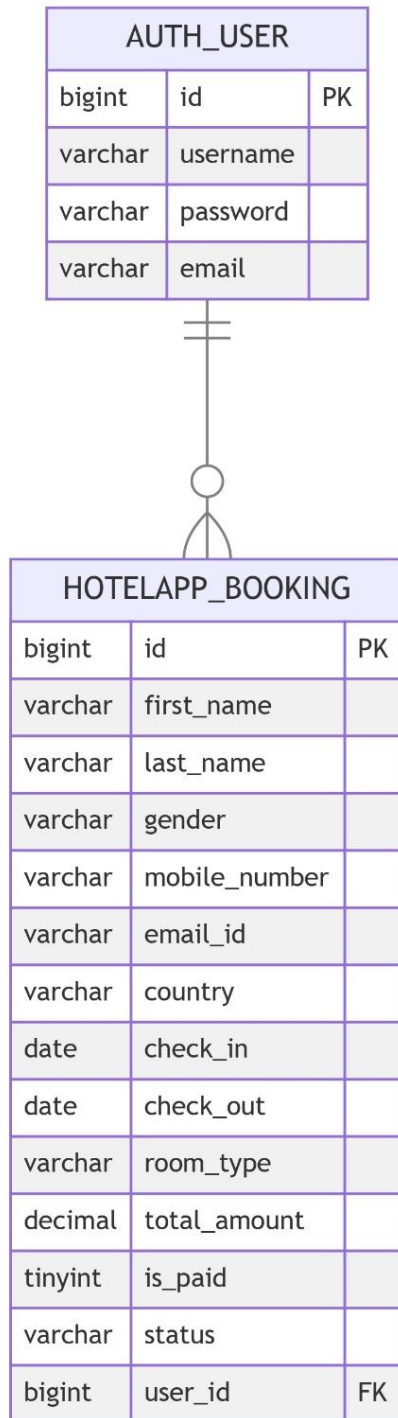

Operating System	Windows 10 or Any other
Web Server	Apache, Laragon
Web Browser	Chrome
Designing Tool	HTML
Server-side Scripting	Django
Client-side Scripting	MySQL

ABOUT CV HOTEL

One of Dubai's most iconic hotels from the past is the **Chicago Beach Hotel**, which stood on the site where the **Madinat Jumeirah** now exists. Opened in the 1970s, this hotel was known for its beachfront luxury and was a favorite among travelers before being demolished in the late 1990s to make way for modern developments. The hotel was named after the **Chicago Bridge & Iron Company**, which had offshore storage tanks in the area. It was a symbol of Dubai's early tourism industry, paving the way for the world-renowned hospitality that the city is known for today. The **Chicago Beach Hotel**, one of Dubai's early luxury resorts, was a symbol of the city's rising hospitality industry in the 1970s and 1980s. Located along the shores of Jumeirah, it was a favorite destination for travelers seeking beachfront luxury before Dubai became the global tourism hub it is today. The hotel got its name from the **Chicago Bridge & Iron Company**, which had large offshore storage tanks nearby. Though it was eventually demolished in the late 1990s to make way for the **Madinat Jumeirah** and other modern developments, it remains a nostalgic landmark in Dubai's history, representing the city's transformation from a modest trading port to a world-class destination.

2. Service Pages :

OUR LUXURY SERVICES

- ROOFTOP DINING -

Experience fine dining with a view at our exclusive rooftop restaurant.

Our gourmet chefs craft exquisite dishes using fresh ingredients, blending international flavors with local delicacies. Dine under the stars with breathtaking city views and signature cocktails for an unforgettable culinary experience. Savor the finest cuts of meat, fresh seafood, and handcrafted desserts prepared with precision and passion.

Our elegant ambiance, paired with warm lighting and soft music, creates the perfect setting for a romantic dinner, business meeting, or special celebration. Whether you're celebrating a special occasion or simply indulging in luxury, our rooftop dining experience promises a feast for all your senses.

- INFINITY SWIMMING POOL -

Relax in our stunning infinity pool, a serene retreat high above the city.

Whether you're enjoying a morning swim, sunbathing, or sipping cocktails at the poolside bar, every moment here is pure bliss. Our temperature-controlled waters offer the perfect escape year-round, ensuring ultimate comfort in every season. Lounge ripples and ambiance melt away your stress as you bask in the golden hues of a Dubai sunset. Our attentive poolside service ensures that your every need is met. As the evening sets in, the pool transforms into a mesmerizing oasis with ambient lighting and tranquil vibes. Dive into luxury and experience the perfect balance of relaxation and indulgence at our infinity pool.

- SPA & WELLNESS CENTER -

Discover ultimate relaxation at our spa, where luxury meets tranquility in an oasis of peace and rejuvenation. Indulge in a range of soothing massages, rejuvenating facials. Our expert therapists use premium products and time-honored techniques to ensure a deeply revitalizing experience. Each crafted to provide the perfect escape from the stresses of daily life. A sanctuary where you can unwind, recharge, and embrace serenity. Let the gentle ambiance and soothing aromas transport you to a world of pure bliss, where every detail is tailored for your comfort. Experience the perfect harmony of mind, body, and soul as you indulge in an unforgettable journey of relaxation and self-care.

- EXECUTIVE LOUNGE -

Designed for business travelers, our Executive Lounge offers a quiet and sophisticated space for meetings, networking, and focused work. With a refined ambiance and modern amenities, it provides the perfect setting for professionals seeking efficiency and comfort. Our lounge caters to all your business needs. Equipped with dedicated concierge services, printing facilities, and exclusive meeting Lounge offers a quiet and sophisticated space for meetings, networking, rooms, we offer a seamless work experience in a luxurious environment. Experience a blend of elegance and convenience, where every detail is designed to enhance your business success.

- CONCIERGE & GYM -

Our concierge team is available 24/7 to provide VIP services, ensuring a seamless and exceptional stay. From exclusive reservations at top restaurants to luxury chauffeur-driven transport, we handle every detail with precision and care. Whether you need personalized city tours, priority event access, or special arrangements, embrace serenity. Relax and enjoy your journey while we take care of everything, creating unforgettable moments tailored just for you. With our insider connections and world-class hospitality, we guarantee a stay that exceeds your expectations. Your comfort, convenience, and satisfaction are our top priorities.

6. Boking Form Page :

The image shows a 'Room Booking Form' with the following fields and values:

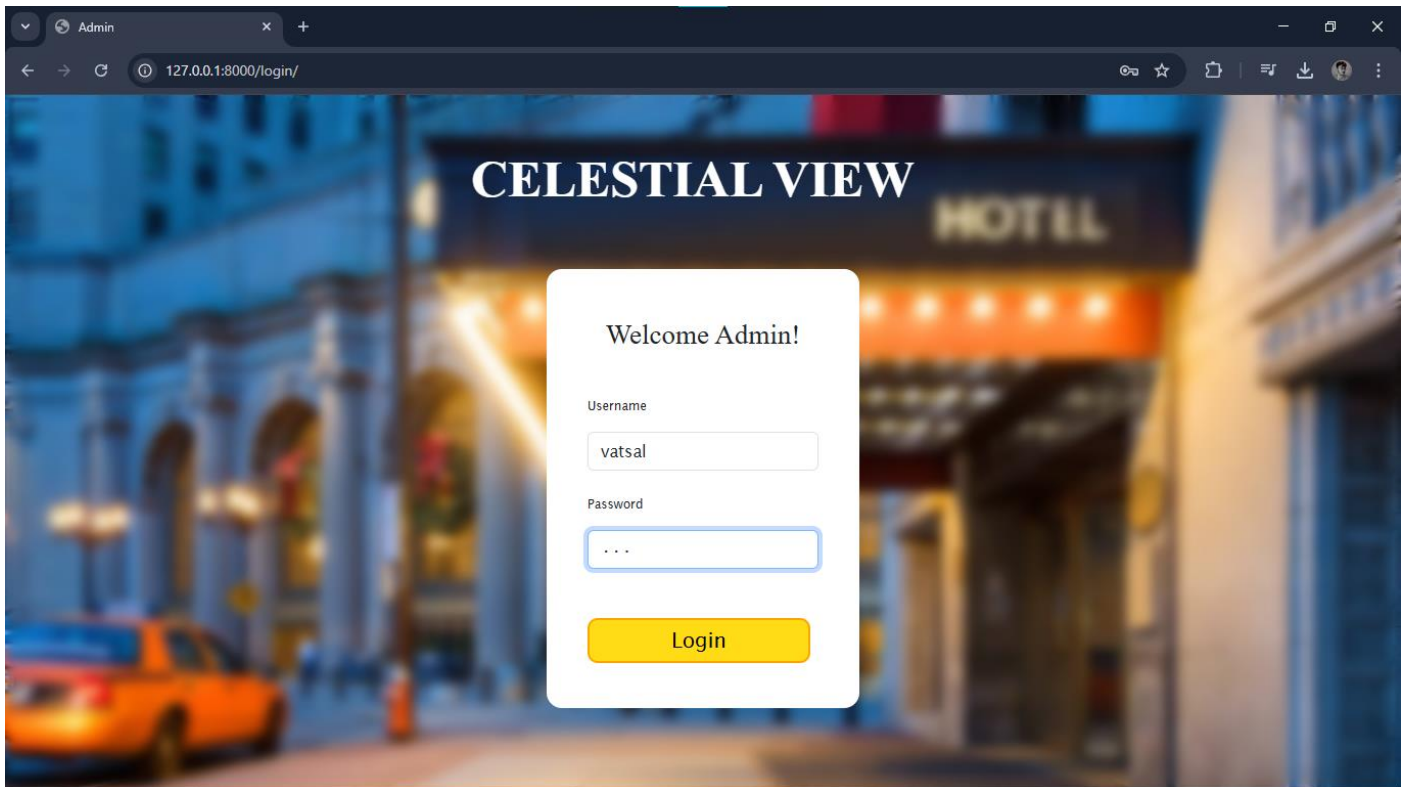

Field	Value
First Name:	Vatsal
Last Name:	Gajera
Gender:	Male
Mobile Number:	9722405522
Email ID:	vgajera2005@gmail.com
Country:	India
Check-in Date:	13 - 03 - 2025
Check-out Date:	25 - 03 - 2025
Room Type:	Luxury Room
Total Price:	120000 ₹ (10000 ₹ per night)

At the bottom of the form, there are two buttons: 'Back to Home' (red) and 'Submit Booking' (green).

- ✓ **Room Selection Dropdown** - Users choose the type of room they want.
- ✓ **Check-in & Check-out Date Pickers** - Ensures correct booking period.
- ✓ **Guest Details Form** - Collects name, email, phone number, and special requests.
- ✓ **Price Calculation** - Automatically calculates total cost based on stay duration.
- ✓ **Submit Booking Request** - Sends booking details to the admin for approval.

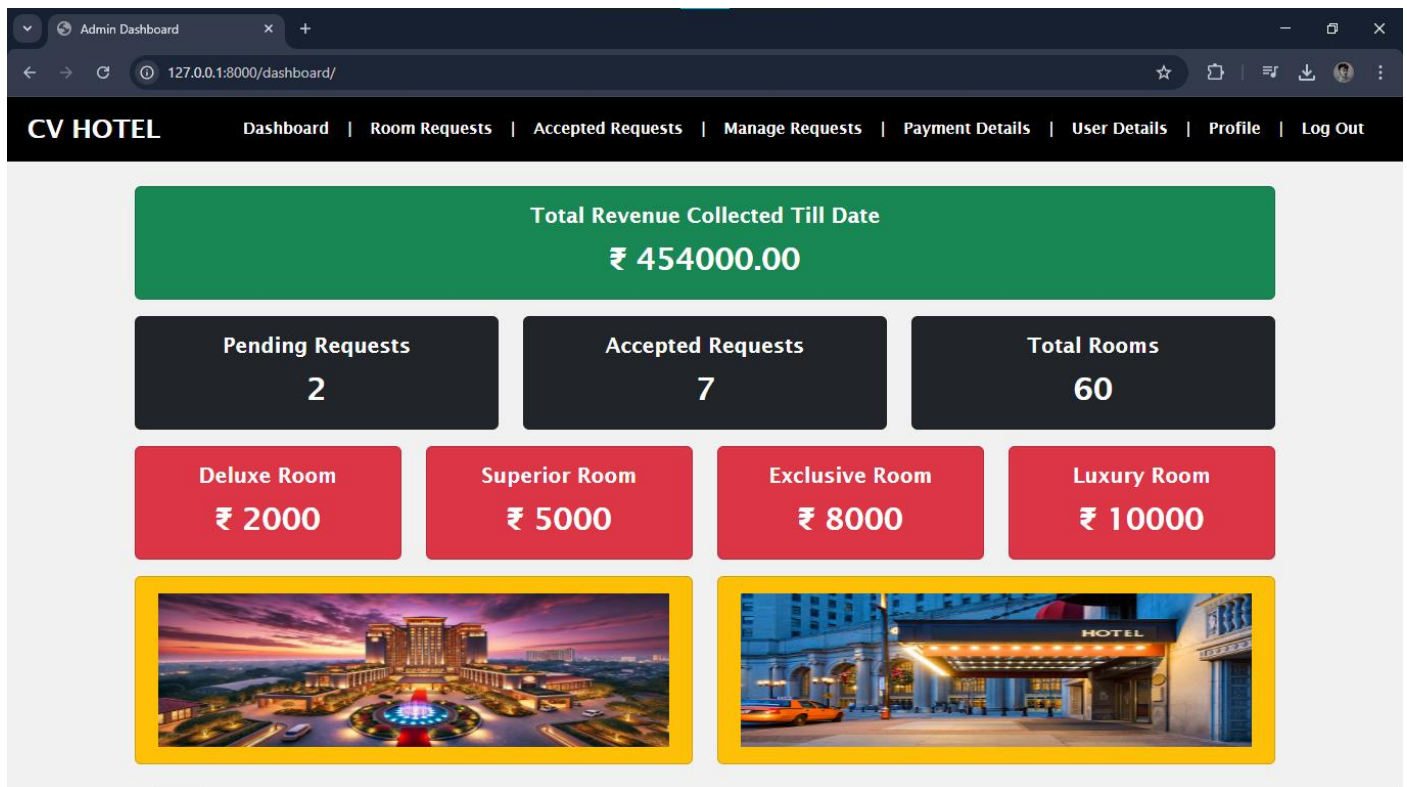

ADMIN PANEL

1. Login Page :

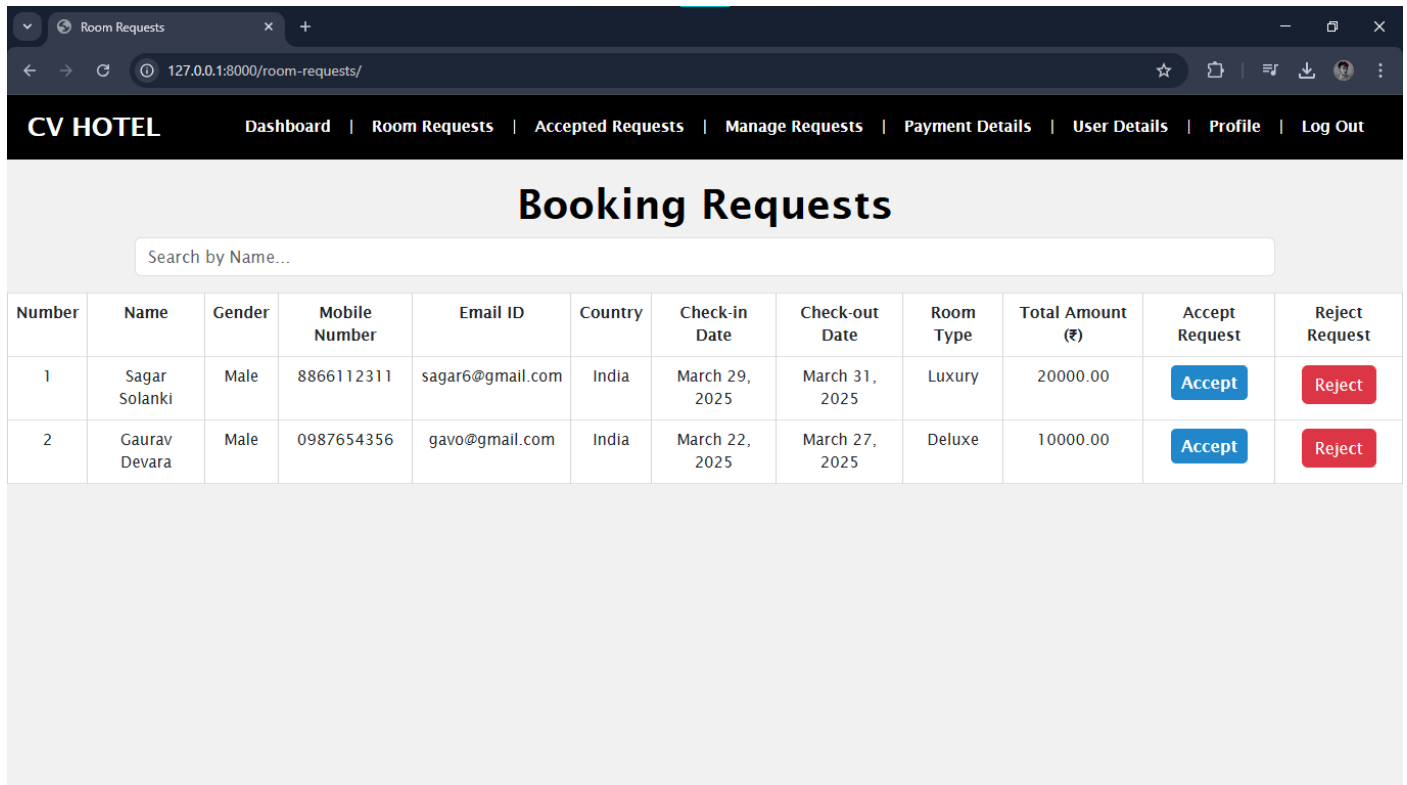

- ✓ **Professional and Secure Admin Login** – Provides a dedicated login page for administrators with a sleek design and strong security (CSRF protection).
- ✓ **Stylish and Responsive UI** – Uses a blurred background effect with a well-designed login box for a modern look.
- ✓ **Clear and Readable Form Inputs** – Includes labeled fields for username and password, ensuring easy readability and usability.
- ✓ **Custom Button Styling** – The login button has hover effects for better user interaction and visibility.
- ✓ **Navigation to Home Page** – Features a clickable "CELESTIAL VIEW" title that redirects to the home page.

2. Dashboard Page :

- ✓ **Admin Navigation Bar** - Includes Dashboard, Room Requests, Manage Requests etc.
- ✓ **Admin Profile Section** - Displays the logged-in admin's name.
- ✓ **Quick Access to Bookings** - Direct link to pending room requests.
- ✓ **Manage Payments Section** - Allows admin to track and verify payments.
- ✓ **User & Booking Statistics** - Shows an overview of hotel activity.

- ✔ **User Management** - Displays a list of registered users with details.
- ✔ **Delete Option** - Allows admin to remove users easily.
- ✔ **Styled Table Layout** - Enhances readability with a clean design.
- ✔ **Bootstrap Integration** - Ensures a responsive and modern interface.
- ✔ **Navigation Bar Included** - Provides seamless access to other pages.

9. Profile Page :

- ✓ **Profile Display** - Shows username and email in a structured layout.
- ✓ **Read-Only Fields** - Prevents unauthorized modifications.
- ✓ **Bootstrap Styling** - Ensures a modern and responsive design.
- ✓ **Profile Image Section** - Displays user's profile picture.
- ✓ **Navigation Bar Included** - Provides easy access to other pages.

EVALUATION

1. **Efficient Hotel Administration** - The admin module centralizes management tasks, streamlining operations for improved efficiency.
2. **User-Friendly Dashboard** - The admin panel provides a clear overview of booking statistics, revenue, and key performance metrics.
3. **Booking Request Management** - The system enables administrators to review, accept, or reject booking requests, ensuring seamless reservation handling.
4. **Secure Payment Handling** - Admins can track and manage payment transactions, reducing financial discrepancies and ensuring transparency.
5. **Admin Profile Management** - The system allows admins to view their profile details, ensuring personalized and authenticated access.
6. **Secure Authentication** - The login and logout features ensure only authorized users can access the system, protecting sensitive data.
7. **Enhanced User Experience** - The user module offers an intuitive interface for easy navigation and seamless hotel booking.
8. **Comprehensive Room Information** - The detailed rooms page provides pricing, images, and amenities, helping customers make informed choices.
9. **Structured Booking Process** - The booking form simplifies the reservation process by collecting essential user and booking details.
10. **Clear Service Offerings** - The services page highlights available amenities, enhancing user engagement and interest.
11. **Effective Customer Interaction** - The contact page allows users to reach out for inquiries, improving communication between the hotel and guests.
12. **Personalized User Profiles** - Users can view their profile details, ensuring a tailored experience and secure data access.
13. **Static and Dynamic Content Integration** - The system combines static pages for information and dynamic features for bookings, balancing content presentation.
14. **Improved Hotel Marketing**: The home page showcases hotel features, promotional offers, and a gallery to attract potential guests.
15. **Robust Security Features** - With login authentication, secure transactions, and controlled admin access, the system prioritizes data security and operational integrity.

FUTURE ENHANCEMENT

- 1. Real-Time Room Availability & Online Payments** - Implement automatic room availability tracking to prevent overbooking and integrate secure payment options like credit/debit cards, UPI, and digital wallets.
- 2. User Feedback & Promotions** - Introduce a review system for guests to rate services and implement discounts, loyalty programs, and promotional offers to attract more customers.
- 3. Automated Notifications & AI Chatbot** - Enable SMS/email booking confirmations and integrate an AI-powered chatbot for instant customer assistance.
- 4. Multi-Language & Mobile App Support** - Add multiple language options for better accessibility and develop a mobile app for seamless hotel booking on smartphones.
- 5. Role-Based Access & Security Enhancements** - Implement different access levels for admins, receptionists, and staff to improve security and management efficiency.
